Outlook Anywhere – Remotely connect to email without VPN
Enable Outlook Anywhere in Outlook 2010/2013 for Windows

1. On the **Tools** menu, click **Account Settings**, select the Exchange account, and then click **Change**.
2. Click **More Settings**, and then click the **Connection** tab.
3. Under **Outlook Anywhere**, select the **Connect to Microsoft Exchange using HTTP** check box.

   ![Outlook Anywhere Setting](image1)

   Note: If the Outlook Anywhere section is not available, your computer is probably not running Windows XP Service Pack 2 or later.

4. To specify a proxy server, click **Exchange Proxy Settings**.

   ![Exchange Proxy Settings](image2)

5. Click **OK**.
6. If prompted, login with your CSUDH credentials.
